

Exploring our Elegant Divinity Out of the box and into the Light

Workshop members will explore two main themes: creating a deep and permanent anchor with the Divine Creator and initiating meaningful communication with beings of Light. Participants will feel a greater connection with the Source and with their own divinity, their soul. Once they experience this sacredness through heightened awareness and inner love, they will have created an anchor. This anchor becomes the platform for communication with higher worlds which permanently vibrate to the elevated consciousness which we may call Christ Consciousness. Participants will receive the necessary tools to cultivate both inner divine anchoring and communication with the beings of light and noble consciousness, so that participants may continue to grow spiritually in every day life and tune into living with a higher vibrational community. They may then elect to become emissaries of Light for our world.
